

GUARDIANT™ COUNTERTOP SHIELD + SNEEZE GUARD

Single Screen Assembly Instructions:

1. The foot/base assembly (2) will have screws and threaded square nuts already attached.
2. Align the foot with the post of the side frame and insert, matching the square nuts with the exterior channel.
3. Position the foot assembly so the button-head of the two screws are on the outside of the Guardian™ Countertop Shield.
4. Slightly tighten each screw with the included Allen wrench, do not fully tighten.
5. Repeat the above steps for the second foot.
6. Once the second foot has been attached, set the Shield upright.
7. Once you confirm that the Shield is standing straight and perpendicular, adjust as needed to achieve, then finish tightening all four screws.

To achieve a semi-permanent mount, your Guardian™ Countertop Shield + Sneeze Guard can be secured to the counter by way of:

- Appropriate screws and /or anchors matched to the specific counter material. Attach hardware (not included) through the holes in each foot.
- Using industrial double-sided tape (not included) to achieve a secure positioning.
