

UNIQUE, ERGONOMIC AND TIME SAVING LOCATIONS IN CHECK-OUTS

SERIES | 1150

Short Depth Cash Drawer

Short depth, space saving for location directly at the point of payment

Same high capacity APG tills using smallest possible counter space footprint.

The Series 1150 cash drawer is ideally suited to Grocery, Ticketing, Hospitality, Quick-Serve, Gas, C-Store and Mobile check-out; essentially wherever service counter space is at a premium.

Standard APG high capacity tills combined with ample media space are packaged in the smallest possible cash drawer footprint to make the Series 1150 the ultimate space saving drawer.

The unique size of the Series 1150 cash drawer allows it to be mounted directly on the check-stand deck. When installed at the correct working height and downstream from the scanner scale, this cash drawer can be located exactly at the point of payment. The Series 1150 can provide easy access for the cashier and eliminate twisting, turning and bending to reach traditional, side counter mounted, cash drawers.

A faster, friendlier, customer facing point of payment saves up to 5 seconds per payment transaction. Placement of the cash drawer in front of the cashier improves open till security.

APG CASH DRAWER®

The Recognized Leader

INCREASE EFFICIENCY, SAVE SPACE

SUPERIOR FEATURES, SUPERIOR FUNCTION, PROVEN DURABILITY

Unique short depth cash drawer enables downstream location without infringing upon the scan path

Placement of the drawer at deck height provides easy access without twisting, turning and bending

Mounting on the check-out deck, under the service counter or in a reduced depth side counter, the Series 1150 is a space saver wherever it is located

Provides surface for placement of other peripherals to allow for greater customer counter area

Located immediately in front of the point of purchase the open till is securely attended by the cashier during payment

The smallest cash drawer able to accommodate a full size till

Reduced payment time increases cashier IPM
