

E3600 Flip-Top

Built for Retailers, Built to Last

Performance Solution

The Flip-Top cash drawer is focused on low cost of ownership, ease of use and speed through the check-out. Tested to last beyond two million operations, the Flip-Top delivers uncompromising performance and quality.

The narrow depth of the cash drawer provides easy access to the coin and vertical bill storage whether the clerk is seated or standing at the point of sale. It saves space, decreases transaction times and improves service.

Reliability

With superior design, durable steel construction and a resilient powder coat finish, the Flip-Top design has been vigorously tested to endure more than 2 million operations, ensuring it will perform flawlessly for the life of the POS system.

Durability

Tough lid release mechanism stands up to slamming, yet latches firmly under gentle pressure. Check-outs are kept running smoothly, regardless of how associates treat the cash drawer.

Speed + Efficiency

Routinely tested to ensure the lid will open rapidly and consistently beyond 80°. Full access to the till reduces check-out associate frustration. Payment transaction times are cut. Service to the customer is improved.

Lid Opens Consistently

Flip-lid opens fully to 80° providing easy access to the till.

Interfaces to Suit

Adapts to most POS Systems.

Standard Lock Options

The Flip-Top cash drawer is keyed randomly or alike from 4 lock codes. The locking till cover is available with a single lock code.

Robust Latch

Withstands slamming and closes even with a light touch.

Proven Reliability

Tested to last beyond 2 million operations.

Advanced Drawer Lock Options

The Flip-Top cash drawer can feature the added security of being randomly keyed from 100 mutually exclusive lock codes.

Till

8 coin, 4-6 bills locations with removable divider to adjust bill spaces. Features integrated media storage.

Till Cover

Provided with every unit, the locking till cover fully encloses media.

Advanced Till Cover Lock Options

The locking till cover can feature the added security of being randomly keyed from 160 mutually exclusive lock codes.
