

# ACHIEVE CASH MANAGEMENT SUCCESS WITH THE SMARTtill SOLUTION®

Installation success stories within the hospitality, convenience, and grocery store industries.

## Enhanced Customer Service Through Productivity Savings

The owner of the six Grupo Compostelana restaurants has been running his successful business for many years but cash loss at the end of day was a concern as the till did not match the expected revenue. With multiple cashiers operating from a single Point of Sale (POS), it was impossible to identify the cause of the problem. The restaurant owner welcomed the **SMARTtill Solution**®, which ensured that his sales were protected, eliminating £30 of daily cash loss.

## Retail Stores in Dublin Eradicate Cash Shrinkage

Typical convenience stores in Ireland experience high cash usage. Hoping to eliminate cash shrinkage and improve checkout at its 13 stores in and around Dublin, Ireland, the Griffin Retail Group asked its POS systems provider for help. The provider, Galway-based Retail Solutions, reviewed a host of cash management solutions with the client, and one of them stood out – the **SMARTtill Cash Management Solution** by APG Cash Drawer. Retail owner, Mr. Bridgette commented “I can quite categorically say this is the best advancement I have seen in retail technology in years”.

## From Counting Cash To Counting On Operational Excellence

The Costcutter store in Porthleven, UK, is a busy place, especially in the summer months when tourists flock to the seaside town. The staff were spending more than two hours daily counting money, calculating cash floats and topping up tills, which hurt productivity. With multiple cashiers using the same tills, it was difficult to hold anyone accountable for discrepancies. After installation, the **SMARTtill Solution**® allowed staff to be more efficient and improve customer service.

## A Supermarket's Recipe for Reducing Labour & Cash Loss

APG's **SMARTtill Cash Management Solution** helps retailers get better control of their cash handling by eliminating the need for manual cash counts. In one case, a multinational grocery retailer was able to save an average of 30 minutes of staff time per store daily and to wipe out millions of security till checks annually from procedures, after implementing the **SMARTtill Solution**®. The company, which operates thousands of stores in Europe and Asia, deployed **SMARTtill Intelligent Cash Drawers** to simplify cash management and free up staff to better focus on customer service.
