

# APG's Guardian™ Shield

## All-In-One Product Guide

## A Retail and Healthcare Solution for Reducing the Spread of Germs

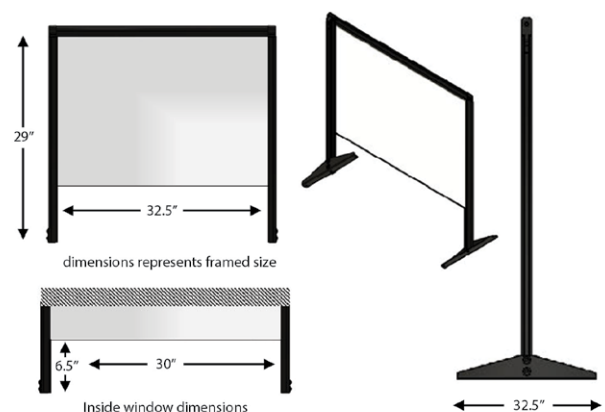

The Guardian™ Shield is a polycarbonate sneeze guard ideal for grocery, convenience, retail and medical settings and is built to help reduce the spread of contagious, airborne germs commonly spread by coughing or sneezing. The Guardian™ Shield provides peace of mind and creates a protective barrier in any place of commerce that requires direct interaction between employees and customers in close proximity such as reception or seating areas, POS checkouts, or vaccination stations.

Built from durable, fire-retardant polycarbonate, sizes include single, countertop, and floor standing models with varying degrees of transparency, with options for the size and type of opening at the bottom, allowing for the transfer of items or payment for transactions. The APG Guardian™ Vaccination Station comes with features like flexible 360 degree hinges with no pinch rounded corners, wall or freestanding mounting options, self leveling wheels, and custom branding options. All products are easy to clean for health protection.

### APG's Guardian™ Single Panel Countertop Shield

#### Product Features:

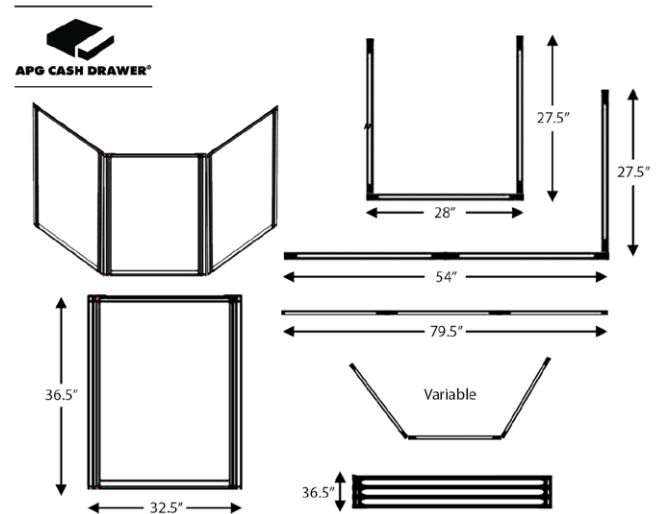

- Aluminum frame and clear polycarbonate construction. Each panel is made of polycarbonate 2.5 mm thick.
- Single Countertop Screen: Each screen is 29in tall x 32.25in wide with a bottom open window of 6.5in x 30in.
- Single panel has large feet on both sides that can be screwed to the countertop for added stability.
- Barcodes can be scanned at checkout through the clear polycarbonate, preventing physical contact from transferring products.
- Able to be cleaned with wipes, bleach, or any common disinfectant.
- Documents and Clipboards can be passed through the opening.
- Helps maintain social distance as you continue to serve your customers.

# APG's Guardian™ Tri Panel Countertop Shield

## Product Features:

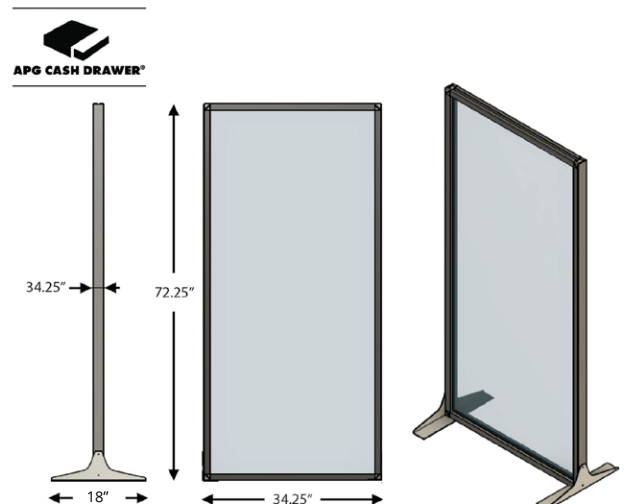

- Extruded aluminum frame has 360 degree hinges with no-pinch rounded corners. Each panel is made of clear polycarbonate, 2.5 mm thick.
- **Tri-Panel Countertop:** 3ft-.75in tall x 2ft-2.75in wide, with 4 feet and a variable depth using included hardware of 1.75in - 2.5in or 4.5in gap at base. Overall length when straightened is 6ft- 8in wide. Each panel weighs 24 pounds.
- **Tri-Panel Countertop Opening:** The Tri-Panel window opening is 8.25in wide x 13.75in tall.
- Fully collapsible; The 3 panel units stack onto one another at a depth of 3 inches.
- Provides comfort and relief for employees and your customers by helping to prevent the spread of disease in close proximity.
- Barcodes can be scanned at checkout through the clear polycarbonate, preventing physical contact from transferring products.
- Tri panel build helps to mitigate airborne contact from coughing, sneezing, laughing, etc.
- Semi-permanent counter mounting available through screws and /or anchors matched to the specific counter material. Attach hardware (not included) through the holes in each foot. Or use double-sided foam tape (not included) to achieve a secure positioning. Four feet included.

# APG's Guardian™ Floor Standing Shield

## Product Features:

- Floor standing shield measures 5'-9 1/2" tall x 2'-6 1/2" wide with 18" feet.
- Full height helps to mitigate airborne contact from coughing, sneezing, laughing, etc while allowing light to pass through.
- Each panel weighs 35 pounds, providing sturdiness so it is not easily tipped over, and adhesive strips or glue can be used to hold the feet in place for added stability or the holes in the feet can be used to directly screw it in place. (not supplied)
- Aluminum frame and clear fluted polycarbonate construction, 10mm thick. Polycarbonate is a versatile, lightweight and transparent material that has some distinct benefits such as being crack resistant and fire-resistant.
- Free-standing, movable wall has legs allowing it to stand on any even floor surface.
- Provides an efficient, aesthetically simple solution for the separation of space in close quarters. Easy to clean.

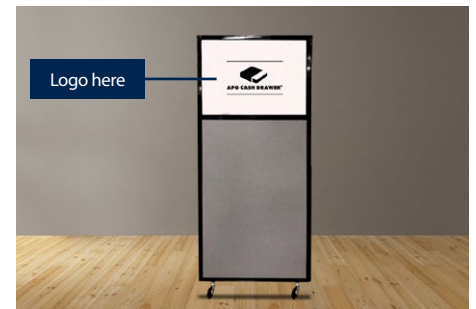

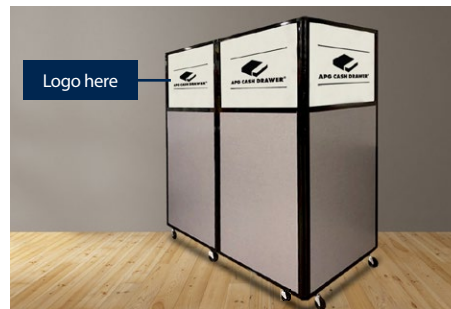

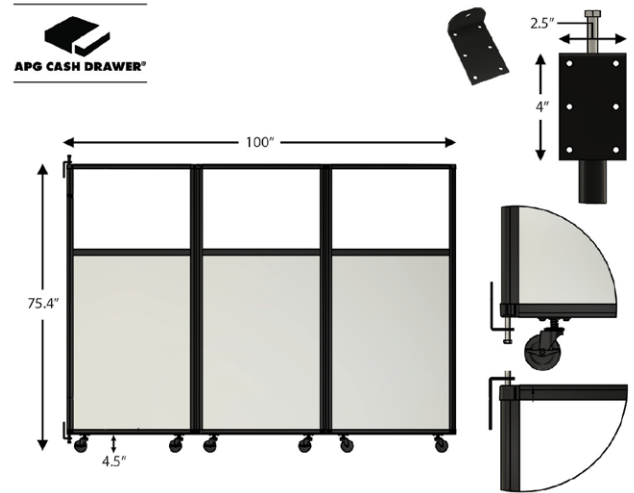

# APG's Guardian™ Vaccination Station

## Product Features:

- The Vaccination Station measures 73.2" tall (not including the 2.2" mounting bracket) x 100" wide with 4.5" tall rolling wheel feet.
- Can be mounted to a wall, collapsible folding for easy storage.
- Properly installed Lower Wall Mount Bracket measures 1s 3.4 Inches from Floor Surface.
- Separate top/bottom sections to be purpose built, allowing for acrylic, metal or vinyl to be used.
- Custom options include different colors, logos for branding and design
- Aluminum frame has flexible 360 degree hinges with no-pinch rounded corners.
- Frosted window transparency allow for light to transfer in while still providing a private window barrier. Up to 3 transparencies available.
- Self-leveling casters make it easy to install the vaccination station on uneven floors, without causing damage to the joints.
