

The Architect

Integrated POS Cable
Management Solution

Upgrade Your Checkout Counter

Revolutionize your point of sale set-up with the Architect. With collaboration at the forefront of innovation, apg®, Epson® and SpacePole, Inc. have come together to create a versatile cable-management system that redefines peripheral organization at the sales counter.

Dynamic routing capabilities designed to declutter wires and optimize the checkout impression

Fully-customizable configuration to best fit your unique peripheral set-up

Structured cable routing streamlines wire organization and diminishes visible clutter

Sturdy construction can easily carry the weight of multiple POS components

Introducing The Architect™ by apg®, an all-in-one point-of-sale cable management solution

Consolidate your POS Hardware

Your point of sale environment requires a specific arrangement. Whether you need optional stands for payment terminals, scanners, tablets, or a variety of other accessories, the powerfully built Architect gives you the freedom to choose. There are countless ways to configure your point of sale system.

Curb the Chaos

Creating a smooth, focused path to purchase turns one-time shoppers into lifetime buyers.

The sales counter, regardless of industry or vertical, is an important touchpoint for anyone who sets foot into a business. Whether it's used to order food or bag up a purchase, the checkout space serves as a transformative spot where a shopper evolves into a customer; and so many things can go wrong during that stage.

The Architect minimizes the distraction of chaotic cables and cluttered hardware; keeping the customer focused on completing the sale and celebrating the shopping experience.

64% of consumers have walked out of a store because of disorganization or physical appearance.
